The other test is the two dish solution. NAB is asking congress, to change the language on Dish Network. NAB is testing satellite radio, like satellite tv. NAB replied, that local cable tv, local broadcasters TV/Radio, should have rights, not the consumers. NAB DOESN'T CARE for the people. 17 million satellite tv subscribers would have to register on waivers, and if not, then they lose their service. Communications on the chopping block June 4th. I am apposed to NAB'S WANTING TO REGULATE AND SUPPORT'S H.R..4026. I appose H.R. 4026, from examining the language. The Traffic and local weather doesn't damage anything. It means easier travel. And finally NAB WANTING LISTENER CONTROL, can't say.
